Our Story

3D Umbrella is a life goal for us. Going back to 2016, our founder Thanos Plotas started his professional journey in the shading industry as an assistant craftsman in an umbrella manufacturing company. Very quickly his talent emerged in the field of sales in Greece and later abroad. Over time and having repaired a plethora of umbrellas from various companies, he found and gathered their drawbacks. Combining them, he made the decision to design an innovative line of umbrellas that would come to correct many of the previous imperfections. His need for innovation and advancement led him in 2019 to establish his own company in Drosia, Chalkida. Driven by his desire to reshape the data of umbrellas, he created modern infrastructure and a team of trained staff in a factory of 2000sq.m. where he began to make his dream come true.

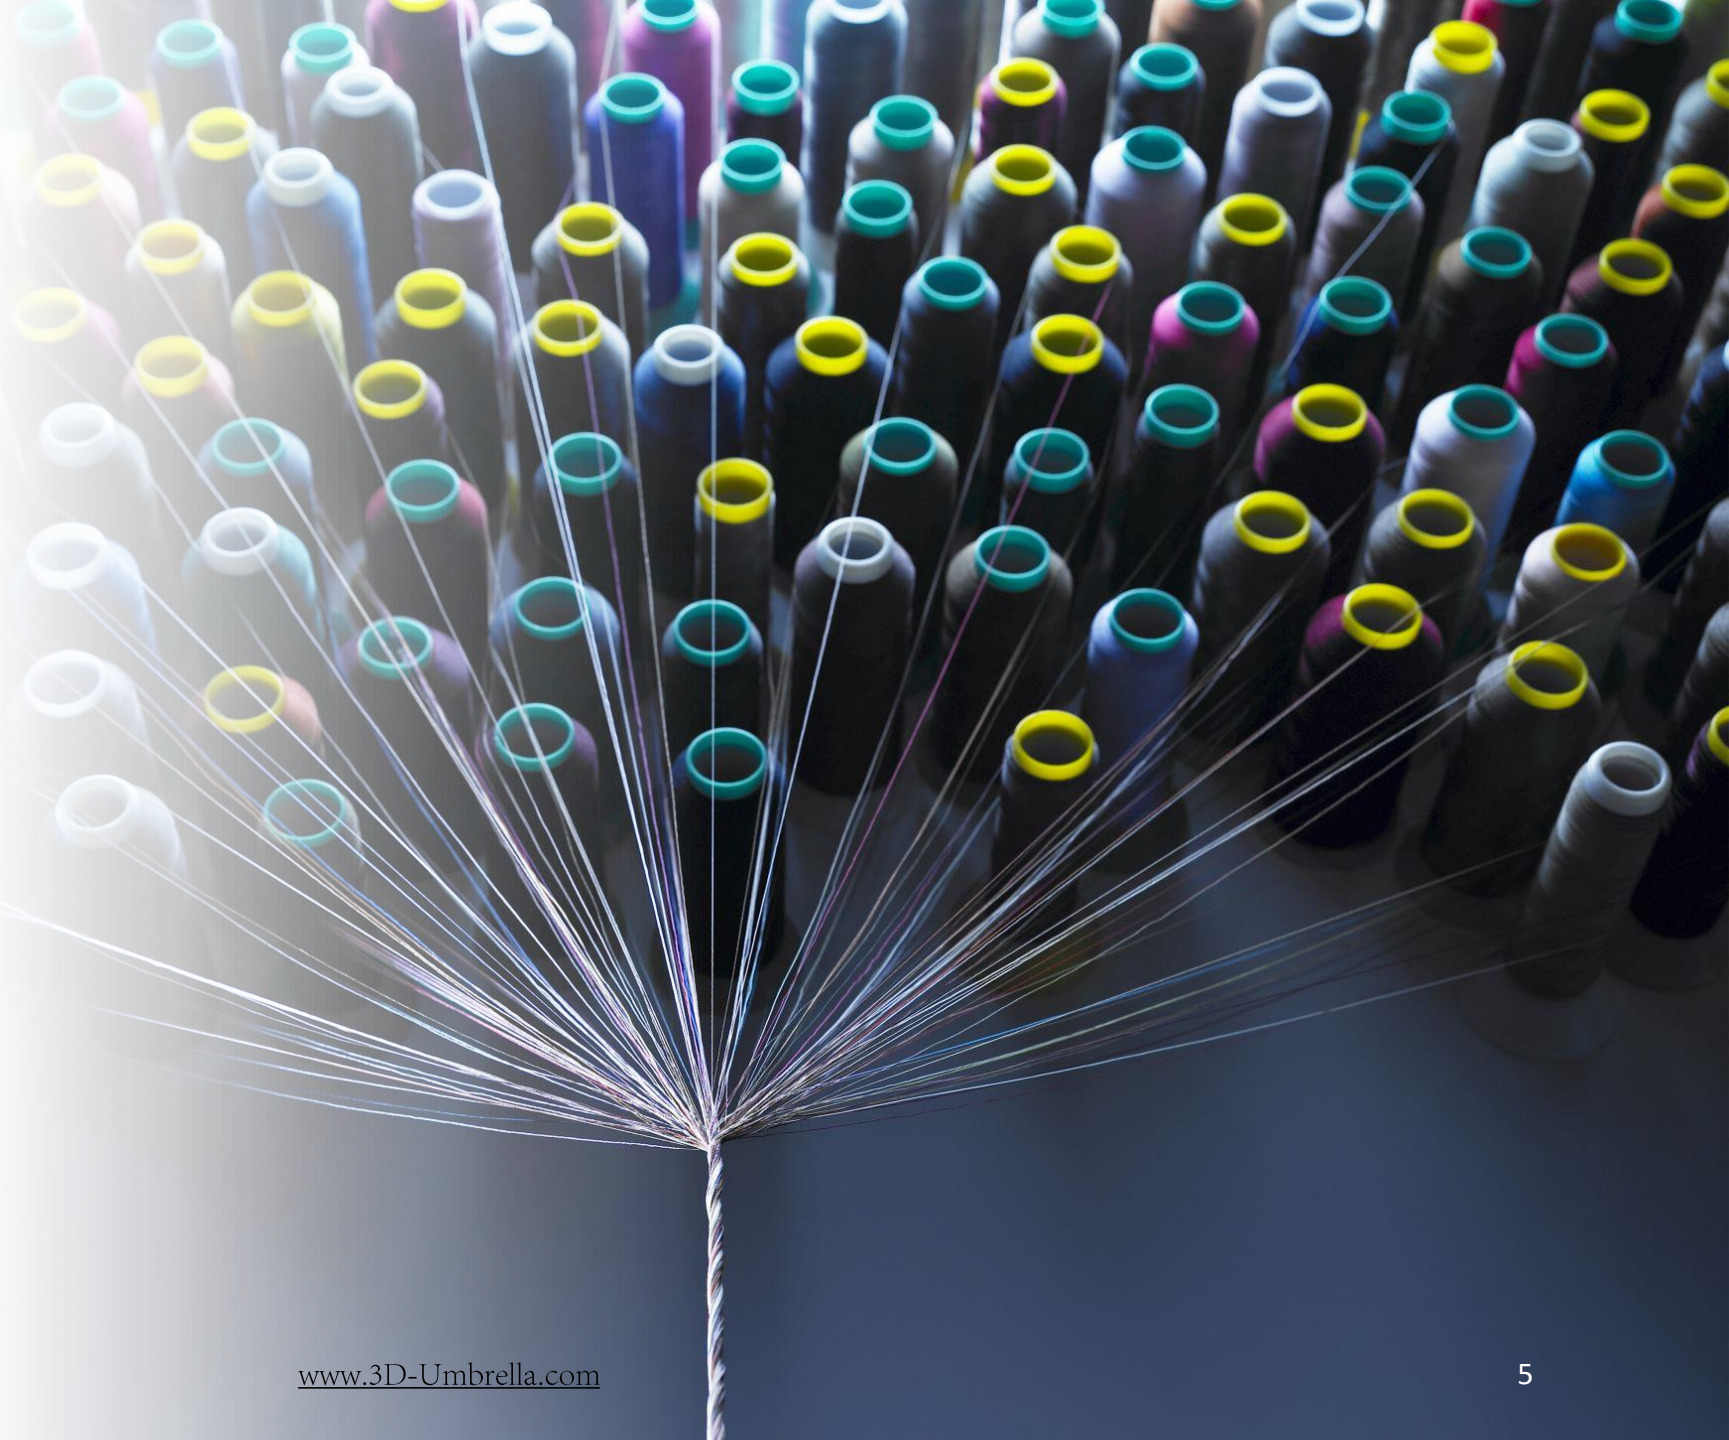

Covid in 2020 could not stand in its way, as he made the most of this time to delve deeper into the design and discover the secrets of 3D printing. This new technology has been an indelible mark of personalization and precision in the manufacturing process, as 3D prints are perfectly integrated into each umbrella offering a perfect and elegant result.

The 3D Umbrella team specializes in the precise/innovative design, high quality and durability of professional umbrellas.

Our primary goal is to offer customized shading solutions to both the wholesale and retail sectors, at the most competitive market prices.

Continuing the journey of modernization, Thanos envisions the complete creation of three-dimensional printed umbrellas (aluminum & plastic) that will each one be distinguished for its unique design, dimensions and shape, depending on the requirements of each customer.

«You imagine we create»

The Secret of Our Success

Impeccable craftsmanship:

Each umbrella is meticulously crafted with precision and attention to detail, reflecting our dedication to quality.

Cutting-edge innovation:

We continuously push boundaries, integrating the latest technology and materials to create umbrellas that surpass expectations.

Customer-centric approach:

We understand the unique needs of our customers and tailor our products and services to exceed their expectations.

Exceptional durability:

Our umbrellas are built to withstand the test of time, ensuring long-lasting performance and providing value for our customers.

Uncompromising style:

We believe that protection should never come at the expense of style, and our umbrellas showcase a perfect fusion of elegance and functionality.

Warranty

MADE IN GREECE

After purchase of each umbrella, 3d umbrella provides you with all necessary guarantees so that you are full covered for any damage that may occur in the following period of time. The warranty covers frame, fabric & electronic accessories.

Proper use in heavy duty frame : 5 years

Proper use in telescopic frame: 10 years

Discoloration of acrylic fabric: 5 years

Discoloration of polyester fabric: 2 years

Proper use in electronic accessories: 2 years

What the warranty does not cover: 3d-umbrella does not recommend or guarantee the use of umbrellas in winds that exceed the Wind limit by the manufacturer for each of its models -the warranty does not cover any damage caused by fire, vandalism or not proper installation of the product -warranty is for the benefit of the first owner only - warranty covers any manufacturing defect within 1 year from the date of purchase. During this period our spare parts will be sent free of charge - the manufacturing company has no responsibility during the transportation of the products - the warranty covers the replacement of defective parts but not the cost of labor - any modification or repair made with refined materials than repair kit provided by 3d umbrella may void the warranty.
