GLORIA WH 6 PRO

GLORIA PRO line - environmentally friendly water extinguisher with top level results - 9 litre with 43 A!

GLORIA WH PRO series - fire extinguishers with rating up to 43 A – without additives harmful to the environment. Water extinguishers comparable to foam fire extinguishers in the A-rating.

Especially useful in extinguishing of wood, paper and textile, due to good wetting of hydrophobic materials.

GLORIA WH 6 / WH 9 PRO – strike-knob, cartridge operated water extinguishers

A comprehensive product range with consistent strike-knob operation, with an in-house developed, fibre-glass reinforced, high-quality special plastic valve in the distinctive GLORIA design, integrated with stable handle for easy carrying.

GLORIA water WH PRO extinguishers can be used in the following fire classes:

Type	A	B	C	MED
WH 6 PRO	34	–	–	–
WH 9 PRO	43	–	–	–

Areas of use:

- Agricultural sector
- File storage
- Offices
- Wood processing
- Paper and Packaging storages
- Textiles
- Firing ranges and banquettes
- Marine industry
- Living areas

Extinguishing agent definitely without environmentally damaging, perfluorinated tensides PFOS or PFOA.

Extinguishers leave minimum contamination after the fire fighting deployment.

Water extinguishers with a capacity of 6 and 9 l of water, enriched only with a biodegradable, impregnating additive.

Hose connection and diptube made of stainless steel.

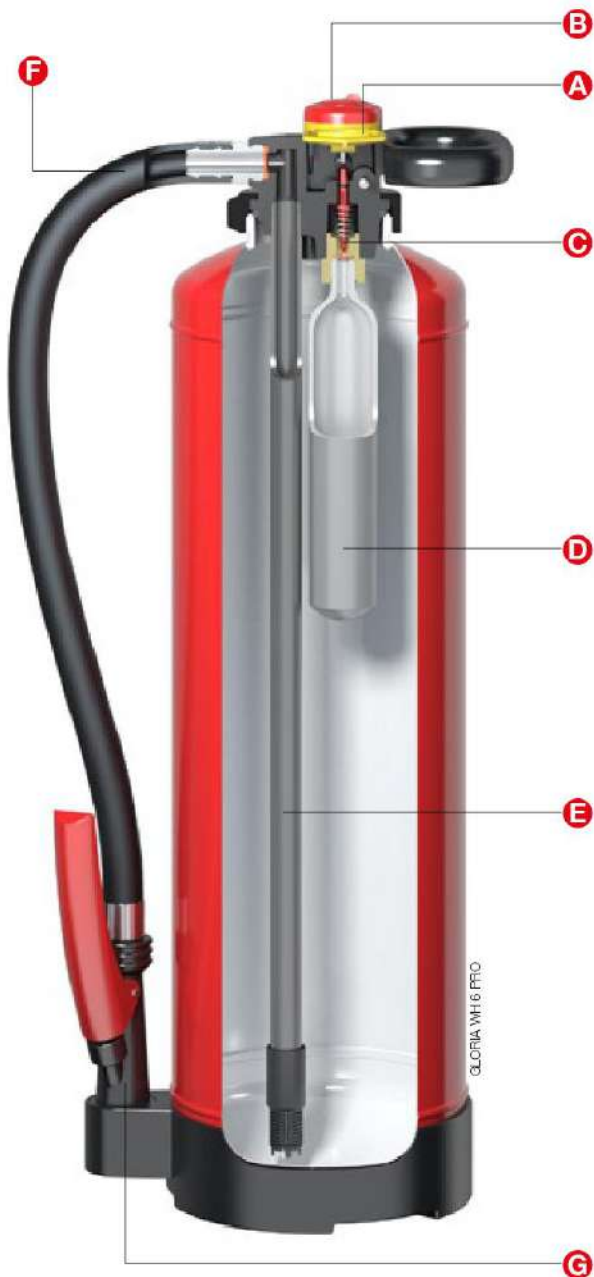

Extinguishers with special nozzle for high area protection and smooth output.

With colour coding of extinguishing agent - the blue colour code for water.

Serially equipped with quality wall bracket, appropriate car brackets are available separately.

WH 6 / WH 9 PRO

portable

- Pull the **yellow safety pin A**.
- By operating the **strike knob B**, the **puncture pin C** laps the **CO₂ gas cartridge D**.
- Abruptly **CO₂** flows into the container.
- Through the **driptube E** the extinguishing agent gets into the **hose assembly F**.
- The rotating and suppressible **extinguishing pistol G** allows for a targeted and largescale fire fighting.

GLORIA WH PRO - safety pin.

GLORIA PRO line family.

Product and performance features

- Fire extinguisher container with two suspension clips, made from high quality steel, externally covered with hard-wearing polyester resin powder coating, free from heavy metals.
- Wet fire extinguishers with high-quality, long-lasting internal coating against corrosion.
- Consistent, high-strength fibre-glass reinforced special plastic valve body – strong, sturdy, stable, moisture resistant, corrosion free, high temperature resistant, UV resistant.
- Large, maintenance friendly neck ring M 74, consistent, black-coloured, anodised metal union nut.
- Internal CO₂-gas cartridge with PE-coating and connection thread M 18.
- Shock-resistant plastic footing ensuring stability and protection against damages and corrosion.
- Three bolts welded on the bottom of the container ensure excellent fitting of the footing against drop-off or twisting.
- Long-lasting hose assembly with fabric lining made from synthetical rubber material.
- Approved to use on electrical installations up to 1000 V at minimum distance 1 m.
- Each fire extinguisher delivered in a separate cardboard box.
