GLORIA KWH-12

Ideally suited for the protection of fire extinguishers against shock, weather and temperature

Labeling and triggering of the fire extinguisher are recognizable at any time as a result of application crystal-clear plastic elements in front of the cover (GLORIA KWH-6, KWH-12, FS-6 /EK).

Quick access to a fire extinguisher due to the fast disassembly latches.

GLORIA protective covers provide effective protection against fire extinguisher contamination and are available for almost all types of fire extinguishers.

GLORIA protective covers ensure a constant operational readiness and long-term stability. The full functionality of the extinguisher is retained. Made of 100% recyclable material.

Problem-free attachment of the extinguisher in the covers without kinking of the hose.

Areas of use:

- Installation on vehicles,
- Outdoor Installation,
- Installation of fire extinguishers in dusty and aggressive environments,
- The mining companies.

Lightweight and very compact construction.

KWH-6, FS-6 /E/K, KWH-12 - the closing parts can be sealed, without extinguisher hanger.

TruckBox Compact, BigBox, BigBox XL - rotation by 180° to select the opening direction.

TruckBox Compact, BigBox - with the installation instructions, packaged individually in cardboard boxes.

KWH-12 - suitable to be mounted on the wall, also for fire extinguishers with external propellant bottle.

BigBox / BigBox XL - for mounting on walls and in vehicles.

TruckBox Compact – ideal for the transport of hazardous goods. Possible horizontal or vertical montage.

Fixing points pre-perforated in plastic. Standard with 3 square holes for holding M 10 screws and 4 holes (Ø 6.5 mm) in the metal base plate.

BigBox XL - delivered with sticker with fire extinguisher symbol according to ISO 7010.

Product and performance features

- KWH-6, FS-6 /E/K - made of plastic, a front part transparent (PETG material), the 3 mm thick back base (PS-PE) featuring 2 x latches, 2 x hand grips.
- KWH-12 - the cover made of a transparent material (PETG). Plastic base of 3 mm thick material (PS). Featuring 2 galvanized steel, chromated latches.
- TruckBox Compact - a red container made of injection moulded polypropylene (acid-proof, fuel and temperature resistant) with a metal base plate at back part. Foam inserts, a metal plate and an additionally sturdy reinforced textile strap with quick-release metal fastener ensure optimal fixation of the extinguisher even in the case of strong vibrations. Possibility of using a security seal to prevent unauthorized access. Container triple sealed by 2 EPDM lid closures. Fire extinguisher symbol stamped on the cover.
- BigBox - a container is made of impact-resistant polypropylene, injection moulded and compliant with REACH. Protection against splashing due to the rubber seal around the perimeter. Red top part with a sight-glass and a vibration tested black bottom part. In order to secure the fire extinguisher, a nylon band (red) is used with a latch and additional protection against scratches; a safe double lock placed on the side.
- BigBox XL - to fix the extinguisher a strap with quick release button (red) is used.
