GLORIA®

Cabinets for one / two extinguishers / with call point

accessories

GLORIA WS-FL 12-mS

Heavy-duty equipment for demanding application!

The individual protective cabinets are designed in accordance with applicable regulations, which guarantee their functionality and high quality.

With regard to possible details or other requirements, it is necessary to consult with the responsible body for fire protection.

Depending on the installation situation, either a wall cupboard (for surface mounting or for flush installation without plaster molding) or a built-in cupboard (recessed models) with circumferential cleaning strip can be used.

Areas of use - protecting against:
- unauthorized access of extinguishers,
- misuse of extinguishers,
- damages of extinguishers.

As standard, GLORIA protective cabinets are made of hot-dip galvanized sheet steel to ensure greater corrosion protection and thus a longer service life compared to "simpler" versions made of blackplate.

In addition, the recessed trim strip made of reinforced angle steel gives the cabinet additional stability (in built-in models).

Sloped roof to facilitate drainage in wall cabinets.

All cabinets are supplied with a RAL 3001 powder coating in at the factory, which complies with the requirements of BGV A8 as a signal color code and, if properly installed, requires no further finish coating.

On request, however, the cabinets can also be supplied with a RAL 7035 powder coating -

if another color on site if necessary.

When installing in the outdoor, a stainless steel cabinet is recommended. Both V2A and - for special operating conditions - V4A stainless steel type are available, additionally - V2A + additional transparent coating.

The stainless steel cabinets are delivered as standard with a polished outer surface. On request, powder coating in RAL 3001 is also possible.

The doors of the cabinets are made of the same material as the cabinet and are struck with stainless steel hinges as standard - or with doors made of transparent materials with special hinges for glass doors.

Your fire extinguisher ready to use - in sturdy, GLORIA manufactured, protective cabinet!

Keep your firefighting equipment clean and ready to use. Protect them against accidental actuation and unauthorized access.

Place in a visible location to provide easy access when needed.

Cabinets constructed from galvanised steel are durable and capable to endure adverse weather conditions.
