

Wall / Car / Deck / Wire hangers

accessories

The GLORIA mounting hangers and retaining straps help to secure the fire extinguisher in buildings or vehicles, whilst ensuring that it can be accessed quickly in the event of a fire.

According to standards fire extinguishers need to be wall hung or placed on a stand, in easily visible and accessible place. Brackets provide a cost effective way to conform to these requirements.

On the other hand, transport hangers is the ideal fixture for the installation of fire extinguishers on to moving vehicle and machinery applications.

Areas of use:

- Fixing extinguisher in buildings,
- Fixing extinguishers in vehicles,
- Fixing extinguishers in moving machinery,
- Fixing extinguishers in boats.

Quick release straps allow for easy access in case of emergency.

Compact design of hangers and easiness of installation.

Made of high quality construction steel - with high tensile strength and impact strength.

Galvanized zinc steel or coated with resistant powder lining (red RAL 3000 or black RAL 9005) with trivalent chromate passivation.

UV-durability painted coating is estimated at at least 600 kLy load.

High stability in wide temperature range at least -30 °C/+70 °C.

All metal elements are burr free and with smooth surface and edge finish.

Corrosion resistance - at least 200 hours to red rust when tested to ISO 9227 neutral salt solution.
