

**Reliable
fire suppression!**

GLORIA GLD 120

An obvious way to use - even for someone who has no experience with fire extinguishers!

GLORIA fire blankets are intended to be used for damping down fire on smaller surfaces.

Nonflammable blankets are helpful in high temperatures and are useful in suppressing fires by not allowing any oxygen to the fire.

Fire blankets can be used both to protect people and objects (depending on blanket size).

The application of fire blankets is mostly common in locations where highly combustible materials are stored and operated with.

GLORIA fire blankets could be used to suppress hazardous fat fires in the private service sector and trade, e.g. in large kitchens, cafeterias, fast food outlets and restaurants.

Fire blankets are intended to use as additional protection when standard deep fryers, commercial fryers, equipment for deep-frying, customary chip pans and fat ovens up to maximum 3 l capacity are used.

For bigger chip pans from 3-50 l, using at least one fire extinguisher with proven suitability for extinguishing edible oil and grease fires with a preferred content of 6 l.

Areas of use:

- Camping/caravanning,
- Outdoor barbecues,
- Kindergartens,
- Schools,
- Restaurants,
- Workplaces,
- Galleys on boats,
- Laboratories.

GLD 1 - fire blanket made from toweling-like fibreglass cloth (100%) with handles sewed on. Fireproof up to 550° C.

GLD 120 - small version for private households, silicone coated fibreglass cloth.

Fire blankets can be immediately removed from the case by pulling the handles, acc. to DIN EN 1869:2001 recommendation.

With instructions in German / English / French, folding instructions on the back.

It is recommended to practice the use of a fire blanket as a precaution in case of emergency - without fire and according to the instructions for use. Incorrect handling carries the risk of burns!

It is recommended to use (for personal fires) of fire extinguishers with a minimum distance of 2-3 m.

GLD 120 / GLD 1 fire blankets

accessories

GLORIA GLD 1

Product and performance features

- GLD 1 - fire blanket made from fibre glass as fluffy, towelling-like fabric with strong curling formation for good insulation.
- GLD 120 - fire blanket made from silicone coated fibre glass.
- Grammage 340 / m².
- Edges protected against fraying and ripping.
- In the stable, compact plastic cases, possible wall montage.
- Also suitable for extinguishing fires that spread to the personal clothing.
- Regular quality control including fire tests by independent institute.
